K-Line 820 Sweeper with Collector box and side Gully Brush

The **K-Line 820 range** features a choice of Honda engines, hydraulic transmission to the wheels and power take off to the attachment. The hydraulic systems allow the operator to adjust the power unit to suit many tasks by two simple levers. The Kersten quick attach system is a standard feature of these machines and enables attachments to be changed in seconds without the use of tools. The hydraulic operation also means maintenance is kept to a minimum.

Weed Brush in action

Kersten offers a range of robust attachments for the clearance and collection of debris from a variety of surfaces including roads, yards, tennis courts, factories, synthetics sports surfaces and even grass. Efficient collection may be achieved using the easy to empty collector box while the side gully brush looks after the edges. The front brush guard prevents material from being thrown from the brush when the collector is not being used.

Snow can be cleared using the brush or a snow blade and slippery surfaces dealt with using the salt, sand and grit spreader.
