

## Pedestrian SafetyCutter

SCH 16105

SCH 18105 with  
electric start

- **Robust Construction**
- **Hydraulic Drive**
- **Forwards & Reverse**
- **Variable Speed**
- **Auto-lock differential**
- **Zero-turn Steering**
- **Low Noise 82db**
- **Low Vibration 2.5m/²**
- **Simple Maintenance**
- **Full width roller**
- **105cm (42") Cutting Width**
- **16hp or 18hp twin cylinder Vanguard Engine**
- **Large flotation tyres**
- **Easy Adjustments**
- **Manufactured in Germany**

The Kersten SafetyCutter is a professional, dedicated rough scrub/grass cutting machine that can easily manage the heaviest annual growth. This machine combines leading innovation from two German companies. The safety-mulcher grass cutting system from Humus and the Kersten all hydraulic power unit.

This union offers unrivalled work rate and operator comfort with noise levels below 82db, vibration levels of below 2.5m/s<sup>2</sup> and zero-turn powered steering. The simple drive systems ensure low maintenance and high reliability.

The Humus cutting system uses a serrated helical rotor manufactured from hardened steel. This innovative design greatly reduces energy requirements and the possibility of objects being thrown from the machine during operation.

The 2 front guide wheels provide 4 cutting heights or may be removed completely when the machine is operated on a full width rear roller behind the mowing rotor.

The variable speed hydraulic transmission system and large flotation tyres smoothly ride uneven ground conditions.
