- 75cm Vacuum Width
- Up To 125cm Sweeping Width
- 13hp Honda Engine
- Adjustable Handlebar
- For Sweeping Hard And Soft Surfaces
- Suitable For Commercial And Domestic Applications

Vela Vacuum Sweeper

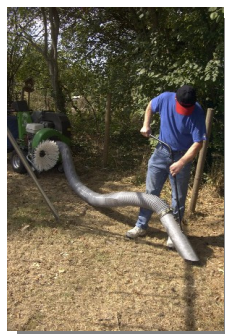

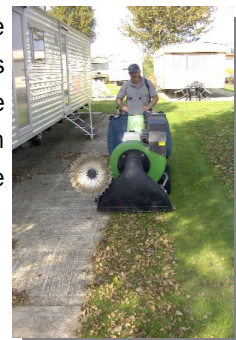

The Kersten Vela is an extremely versatile vacuum sweeper/collector. From front to back it has been designed to the highest standards to achieve maximum productivity and reliability. The 13 hp Honda engine provide ample power to operate the machine with the least amount of noise possible.

A hydraulic transmission system effortlessly drives the machine in forwards and reverse directions at the operators chosen pace and provides power for the optional left and right hand gulley brushes. These brushes really stand this machine in front of any other in its price bracket by

getting in to the corners, moving stuck down leaves and other damp material that other vacuum machines leave behind. Not only does the Vela deal with organic debris it also can vacuum up paper, cardboard, plastic bottles, cans etc.

The massive 350 litre collection bag runs on a trailing platform to ensure the weight of the debris is not put onto the handle bars. The bag may be emptied whilst on the machine or simply unhooked. Summer lining dust bags are available to try to reduce dust in dry conditions or used as a convenient quick change container. The height of the front hood is easily adjusted to allow for different surfaces or selecting the type of material for collection. A 3 metre wander hose can replace the front hood assembly in minutes. For use in larger areas a trailing seat can be simply hitched on the back..
