Westwood/Countax A20-50, D18-50, K18-50, V20-50 Attachments

Kersten offers a range of robust attachments for the clearance and collection of debris from a variety of surfaces including roads, yards, tennis courts, factories, synthetics sports surfaces and even grass. Efficient collection may be made using the easy to empty collector box and the side gully brush looks after the edges. The front brush guard prevents material from being thrown from the brush when the collector is not being used. A sprinkler system can be fitted for use in dusty conditions. The hydraulic operation means maintenance is kept to a minimum and hydraulic lift and angling can be added for ease of operation. Snow can be cleared using the brush or a snow blade and slippery surfaces dealt with using the salt, sand and grit spreader.
